FREE Offer

PWS Prime Web Solutions Ltd are pleased to offer all Cyprus Business Women Members a FREE website analysis report.

Most first impressions are based on your customer's visual perception of your website. However the first step is to ensure your customers are able to find your website.

Your website may look great but if it is not indexed by the search engines your website will not be found.

There are many rules that a website must follow to be indexed by the search engines. Our FREE report will provide the following information:

- **Keyword Rankings** - where your keywords are showing on 5 search engines - Google, Alta Vista, Bing, Ask & Yahoo - providing both page and position information
- **Optimization Advice and Advanced Analysis** - factors influencing your ranking - giving information on your visual text, tags, picture tags etc

Like many things once you have information you are able to make informed decisions.

Contact Margaret on 99482426 for further information or email:
